

S&P 500 Companies by Weight

The S&P 500 component weights are listed from largest to smallest. Data for each company in the list is updated after each trading day. The S&P 500 index consists of most but not all of the largest companies in the United States. The S&P market cap is 70 to 80% of the total US stock market capitalization. It is a commonly used benchmark for stock portfolio performance in America and abroad. Beating the performance of the S&P with less risk is the goal of nearly every portfolio manager, hedge fund and private investor.

Components of the S&P 500

#	Company	Symbol	Weight		Price	Chg	% Chg
1	Apple Inc.	AAPL	6.754915	▼	163.76	-0.76	(-0.46%)

Nasdaq	▼ 13,924.97	-229.05	(-1.62%)

Data Details

The index is constructed using a capitalization weighted index methodology. The market capitalization of each index member is also adjusted by a float adjustment. For additional details see the index methodology reference documentation provided by SP Global below.

[Index Methodology](#)

[Float Adjustment](#)

[Index Documentation](#)

There are 505 symbols due to several companies with two share classes. For example, Google's parent company Alphabet has Class A (GOOGL) and Class C (GOOG) shares in the index.

Index weights as of 01/20/2022.
